Function : Form : Fashion

The motorized drain, electronic bath filler with thermostatic valve and built-in hand shower are optional extra items for the Pamela HydroRelax Pro International.

- DHP™ (Dual Hydromassage Power - Two Pump / Two-Zone Massage Concept)
- Powerful Back Massage with Air Assist Turbo Massage (AATM™)
- Bottom Mounted Air massage
- Independently Operating Water heating with temperature control up to 40C (104F)
- Underwater chromotherapy lighting with various lighting shows
- The optional Bluetooth Audio system
- 10-year limited warranty on the bathtub shell
- 2-year limited warranty on the blower and the pump
- 2-year limited warranty for all electrical components and other parts, except drains
- 2-year overall limited whirlpool system warranty

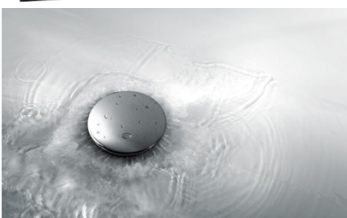

DHP™ (Dual Hydromassage Power)

For larger size hydromassage bathtubs Aquatica offers installation of the second powerful pump. Our proprietary DHP™ (Dual Hydromassage Power) consists of two independently mounted massage systems with separate function and controls. One pump powers an effective general hydromassage while the other one drives the back and foot-massage systems.

Ultra-quiet Tranquility water heating and circulation

Have you thought of just relaxing in a hot bath without hearing the constant noise of hydro massage pump and without being constantly disrupted because you need to add more hot water? Aquatica HydroRelax Pro series bathtubs feature an independent heating and recirculation system equipped with high-efficiency ultra-quiet circulation pump. In fact, the system is so quiet that you cannot hear it working, hence its name "Tranquility". Only the flow of pleasantly warm water will indicate that the system is working as designed.

Electronic Fill & Drain

Being a truly 21st-century product, the Allegra and Pamela series are available with various optional electronic fill and drain solutions. We can offer both standard electronic fill/drain as well as custom made fast fill/drain solutions for the most demanding of our clients like super-yacht applications where the fast drain is a critical safety feature.

Optional Multiplex Trio Electronic Bath Filler With A Bright OLED Display

Optional beautifully designed electronic faucet made of gorilla glass with motorized drain and integrated fill function via drain or overflow outlet. Enjoy precise temperature control, fill level memory, electronic volume control, and diverter functions. The simplicity of its operation makes it a great choice for any homeowner, not just technology enthusiasts.

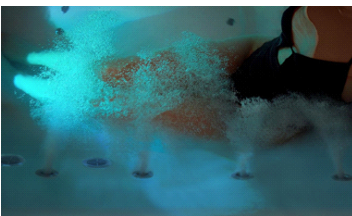

Exclusive, State-of-the-Art Glass Keypad

State of the art capacitive glass keypad that controls all bath functions – the pumps, air-massage, chromotherapy and water temperature.

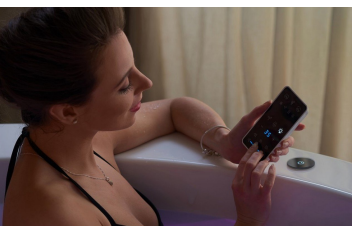

Back massage with Air Assist Turbo Massage (AATM™)

Powerful pump driven therapeutic back massage is a distinctive feature of Allegra HydroRelax. Air Assist Turbo Massage (AATM™) provides a stronger and more intensive back hydromassage.

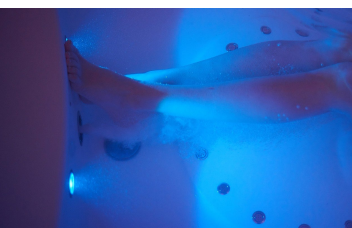

Air-Assist Hydromassage System

Air is injected into the hydro massage system to achieve a more pleasurable massage effect.

Upgrade To Our Exclusive, Capacitive Glass Wireless Keypad

Upgrade to our optional, state-of-the-art capacitive glass wireless keypad controls the pumps, water heating, Bluetooth audio system, stereo speakers and built-in subwoofers. Listen to your favorite tracks in the highest quality without risk of watering your smartphone.

Pre-Installed Underwater Chromotherapy System

Chromotherapy is said to employ light in the form of color to balance and harmonize the body. Aquatica has applied this to an integrated Chromotherapy system available in selected bathtub models to provide yet another delightfully relaxing and rejuvenating facet to bathing. Two low-profile LED lights fitted under the water provide a range of colors which can be set in a slow rotation or fixed color mode to soothe the body and enhance energy levels. Each color in the program has different characteristics and there is a range of chromotherapy light shows bathers can choose from, to create their desired mood.

Ozone Disinfection System

Our HydroRelax bathtubs are equipped with an innovative ozone water disinfection system for a healthier and more enjoyable bathing experience.

Integrated Bluetooth Audio Station

Designed to deliver clean, crisp rich sound in the high-fidelity rendition expected by music lovers, Aquatica Audio Station features Class D amplifier and marine subwoofer to enhance your bathroom audio experience. Delivering 300W peak at low distortion, our audio station features high-quality audio transducers and a built-in subwoofer with integrated digital filter and adjustable volume.
